Blackwell site management

Contracts Manager:
Peter Lyle

Project Manager:
Mark Woodhouse

Site Manager:
Dave McCulloch

Contract Summary:

Blackwell was appointed to undertake phase one of the remediation and earthworks within a former unlicensed landfill site.

Key Processes:

The project involved the following to be undertaken by Blackwell:

- Formation of flood mitigation area
- Provision of temporary fencing to process area, compound, landfill and borrow area
- Installation of temporary sheet piling between landfill and new pond
- General site clearance including treatment of identified locations of Japanese Knotweed
- Temporary diversion of existing brook and provision of crossing points
- Removal and phased restoration of existing soils and capping layer
- Selective excavation, processing and disposal of non-hazardous and hazardous landfill waste
- Screening and crushing of hard materials
- Excavation of borrow area and backfill landfill
- All associated geotechnical and chemical testing and environmental monitoring
