Contract Summary:

The construction of a new access road/junction for a reception centre required Clearance, Service Diversions, Earthworks, Drainage, Roads & Pavings and Fencing Works.

Key Processes:

The scope of the works included the following,

- Site Clearance including tree felling and demolition of above ground structures.
- Associated earthworks and roadworks required for the construction of a new access junction and a 300m stretch of road widening alongside the B790 highway.
- Installing new and diverting existing water, electric and telecom services.
- Implementing a carriageway drainage system.
- Street lighting, ducting, road markings and signage.
- Installing a security fence and gates to perimeter of site.
- Constructing a permanent reception centre, security cabin, wheel wash, security and crash barriers.
- Creating an internal concrete access road.
- Planning, design and construction of a 2km stretch of internal haul road crossing
- Sub-structures and watercourses suitable for articulated road going vehicles.
