

Incident and Injury Free Charter

Our goal is to create an attitude where health and safety in the working environment is founded on collaboration and the freedom to question and participate without fear of conflict or embarrassment.

We are committed to achieving this through the creation of an Incident and Injury Free culture. This requires that we all observe and question our own and others' actions and apply good common sense.

If in doubt **stop, think, ask.**

You will be supported.

IIF is simple. It is about protecting your own wellbeing, that of your colleagues and those around you and as such your family and friends. It is a lifetime commitment to health and safety and is an integral part of everything that we do.

IIF is achievable and we are all involved in making it happen.
