

# Off-Highway Automation Safety online seminar

Register now

TRL

Thursday 29 April 2021 | 13:00 – 16:00 BST | Free

**An increasing number of off-highway industries are adopting automation and taking advantage of the benefits for safety and productivity. As uptake increases, it's important to manage new working practices to ensure that unintended safety consequences don't cancel out the potential benefits.**

Guest speakers:

Kit Franklin - Harper  
Adams University

TRL have developed a draft Code of Practice for off-highway automated vehicles. This provides top level guidance to organisations in all sectors of the off-highway industry on adapting working practices to ensure smooth and safe adoption of automation. To mark the launch, TRL have organised an industry seminar, with key stakeholders from across all sectors of the off-highway industry.

#### What to expect:

- Hear from guest speakers with practical experience of developing and using automated systems for off-road applications.
- Authors of the Code of Practice talk through the development and content of the document.
- Join a discussion on the next steps for the development of safe working practices for automated off-highway vehicles.
